PRODUCT DESIGN EXPERIENCE

Vox Media

Senior Product Designer II, Design Systems Lead *May 2024 - Present*

- Leads design systems for all Vox Media brands (Vox, The Verge, Eater & SB Nation): balances stakeholder needs with good user experience and bespoke brand expression for each site and partners with engineers to maintain consistency and accessibility standards across sites.
- Owns projects from user & data research to code implementation, talking to whoever is necessary to keep the project moving.
- Created unified user experience for sign in, subscription prompts & landing pages, and account management that scaled across Vox, The Verge and *New York* Magazine.
- Improved communications and workflows between design, product, and engineering.

Senior Product Designer I *September 2022 - May 2024*

- Led visual redesigns of Vox and Eater, including full article template overhauls that modernized the reading experience.

Product Designer *June 2021 - September 2022*

- Drove *New York* Magazine's subscription UX end-to-end: designed a perks landing page with a 98% conversion rate and built new features for the subscription flow, registration wall, newsletter signups, and account center.

Slate Magazine

Interaction Designer *May 2018 - May 2021*

- Built Supporting Cast, Slate's internal podcast membership platform: designed a post-signup flow achieving 90%+ conversion and maintained front-end code for public and admin interfaces.
- Led redesign of Slate's podcast pages and conducted extensive user testing on the Slate iOS app.

Industry Dive

Front-end Designer *August 2015 - May 2018*

- Designed and wrote front-end code for a portfolio of 20+ B2B media properties, contributing to visual design, UX improvements, and cross-functional collaboration with editorial teams.
